

Professional Structural Design Engineer Job Posting

Boos Navarre Company Overview

Boos Navarre is a prominent, globally recognized professional consulting engineering firm in the container handling and bulk material handling industries. Boos Navarre maintains professional engineering licenses in 13 states and serves projects and clients in 25+ countries. Even as a small, privately owned firm, Boos Navarre serves clients, such as port authorities, port owners, terminal operators, and terminal maintenance departments, with full service multi-discipline professional engineering solutions for container handling and bulk material handling equipment and facilities.

Position Summary & Primary Responsibilities

The Structural Professional Engineer (“Engineer”) will:

- Maintain responsibility for the structural design services of the firm, including all aspects of structural engineering
- Perform, review, and/or approve all structural engineering work performed by the firm
- Assist in the professional development and training of less experienced engineers
- Establish and maintain standards for the firm’s structural design and analysis
- Lead and/or support multidiscipline project including project management roles
- Manage project execution in accordance with project budgets and schedules
- Interface with firm personnel, clients, equipment manufacturers, suppliers, and other engineering firms to support the firm’s services
- Other duties as assigned to support the success of the firm and its clients
- Maintain professional engineering licensure in good standing, maintain continued professional development, and stay current on structural design and industry standards and technological advancement

Typical Duties

- Prepare structural design packages (new designs, repairs, refurbishments, etc.) including calculations, drawings, technical specifications, and related documents for container handling cranes, bulk material handling cranes, and similar terminal equipment
- Perform structural design analysis, static & dynamic FEA, and develop solutions to complex structural failures
- Review equipment manufacturer structural design submittals for technical specification compliance

- Perform structural condition assessments, witness and evaluate NDT results, and review structural fabrication, assembly, and testing for container handling or bulk material handling cranes and equipment
- Attend design and technical review meetings at project locations, client offices, and equipment manufacturers offices
- Perform site inspections for project equipment

Minimum Required Qualifications

- Bachelor's of Science Degree in Civil Engineering with structural coursework from a university with an ABET accredited engineering program
- Current active Professional Engineering License, in good standing, in Civil/Structural Engineering with commitment to maintain licensure
- 8+ years of full time experience in heavy equipment or steel structure design and finite element analysis (FEA) of structures
- Proficiency with structural FEA software, drafting software, and Microsoft products
- Working knowledge of Ansys, SolidWorks 3D, AutoCAD
- Knowledge and application of design codes such as IBC, ASCE, AISC, ACI, FEM, etc.
- Analytical/critical thinker with problem solving focus and ability to make decisions in a timely manner
- Strong communication and technical writing skills with proficiency in English
- Ability to work self-directed on multiple projects
- Self-disciplined, driven, high moral and ethical standards, and work well in a team environment
- Ability to travel globally (up to 20% travel) for trips typically 1 week or less, but periodically up to 2 weeks
- Work on exterior, open-air structures with heights exceeding 200 ft. with ability to climb and enter internal structural members
- Ability to work in the US without a current or future need for visa sponsorship

Preferred Qualifications

- Proficiency with specific software: Ansys, SolidWorks3D Simulation, and AutoCAD
- Proficiency with civil/structural design of marine terminal structures and foundations including wharf/dock design, pile and soil support systems, foundation systems, seismic design, etc.
- Aptitude and knowledge of mechanical equipment and electrical power distribution and control systems
- Experience with container handling and bulk material handling equipment and terminals
- Local to the Mobile, Alabama vicinity
- Ability to travel globally more than 20% with trips exceeding 2 weeks

Employment Details

- Boos Navarre is an Equal Opportunity Employer and does not discriminate on the basis of race, color, religion, gender, age, national origin, disability, sexual orientation, or marital status.
- Salary is viewed as very competitive in our industry and commensurate with industry experience and technical expertise
- Boos Navarre offers an extensive, competitive benefits package including health insurance, dental insurance, vision insurance, 401k, travel compensation, paid sick time, paid vacation time, paid holidays, and more.
- Employment at Boos Navarre is “at will” in accordance with the State of Alabama
